YOUR PERSONALIZED CARE

Unlike many large groups or facilities, when you visit our practice, you are visiting family. You will get to know your surgeon and team members because you'll always work with the same people. When you call, you will speak to the same people you meet in our office. We understand surgery may be a big decision, and that is why we are always here to help you in any way we can.

YOUR EXPERIENCE

Through discussing different treatment options and coordinating care with your primary care physician, we focus on a combination of achieving the best surgical outcome while maintaining a minimally invasive approach. Dr. Charles-Harris along with his excellent medical and administrative team, provides knowledgeable advice and expertise in the fields of Breast Surgery, Abdominal Surgery, Vascular Surgery, Endovascular Surgery, Colorectal Surgery, and Surgical Oncology. You can expect to be given surgical choices in line with the latest state-of-the-art techniques.

Whether you need minor or major surgery, our aim is to make the surgical process as smooth as possible. During the appointment, each patient scheduled for a test or surgery will receive a personalized treatment package with your upcoming date and step-by-step instructions to prepare for your treatment. We offer surgery at multiple locations.

We look forward to providing you with excellent service and exceeding your expectations!

YOUR SURGICAL TEAM

Our highly-skilled medical and administrative team are dedicated to treating patients like their own loved ones and working with referring physician offices like their friends. They go over and beyond to educate patients about their insurance benefits or assist in coordinating care for other doctors or facilities. Care is always available in Spanish and Creole.
